

PREM M

AI Engineer — Full Stack Developer

+91 9566535909 — mprem5032@gmail.com — [linkedin.com/in/m-prem](https://www.linkedin.com/in/m-prem)
github.com/premwizard — mpremportfolio2610.netlify.app — Coimbatore, Tamil Nadu, India

Summary

AI Engineer and Full Stack Developer specializing in LLM-integrated applications, multimodal AI workflows, and scalable web platforms built with React.js, Node.js, Flask, MongoDB, and PostgreSQL. Delivered measurable impact across healthcare AI, automation, and generative AI products — including a 60% reduction in prototype generation time and 3+ hours of weekly manual effort eliminated through automated reporting pipelines. Certified in AWS ML, Azure AI, and Databricks GenAI fundamentals.

Skills

- Languages:** Python, JavaScript, TypeScript, SQL
- Frontend:** React.js, Next.js, Redux.js, Tailwind CSS, Bootstrap, Responsive UI Development
- Backend:** Node.js, Express.js, FastAPI, Flask, Django, REST APIs, JWT Authentication, Socket.IO, Microservices, Prisma ORM
- Databases & Cloud:** MongoDB, PostgreSQL, MySQL, Redis, ChromaDB, Firebase, Supabase, MongoDB Atlas, AWS, Azure
- AI & Machine Learning:** TensorFlow, NLP, LangChain, Ollama, LLM Integration, RAG Systems, MCP Server, ADK, Generative AI, Gemini API, Pandas, NumPy, Matplotlib
- DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, Kubernetes, Postman, Nginx, Render, Vercel, Figma

Work Experience

- AI Engineer Intern — ECLearnix Edtech Pvt Ltd, Coimbatore** Apr 2026 – Present
Contributed to the development of 4 AI-driven applications and intelligent systems using Python, Machine Learning, Deep Learning, and Generative AI technologies. Worked on projects including an MCP-based AI agent system, a Text-to-Design AI platform, an AI-powered UI/UX automation tool, and an intelligent workflow automation system. Implemented LLM integrations, prompt engineering pipelines, backend modules, and AI-driven automation workflows to enhance system efficiency and user experience. Collaborated in an offline development environment to build scalable and production-ready AI solutions.
- Full Stack Python Developer Intern — Code Infinite Technology, Coimbatore** Jun 2025 (4-week internship)
Developed a full-stack Django-based web application using Python, SQL, HTML, CSS, and JavaScript, implementing backend logic, database workflows, and end-to-end features within a structured 4-week internship program.
- Machine Learning Intern — EMGLITZ Technologies, Coimbatore** Dec 2024 – Jan 2025 (4-week internship)
Built and implemented a machine learning project applying preprocessing techniques and ML algorithms on real-world datasets, using Python-based data analysis and visualization workflows to improve predictive accuracy and surface key patterns.

Projects

- MediSync360 — AI Powered Healthcare Ecosystem** [GitHub](#) 2026
- Built a scalable AI-powered healthcare ecosystem integrating 10+ healthcare modules including patient monitoring, wearable analytics, workforce management, and medical interoperability using React.js, Node.js, Flask, and MongoDB.
 - Implemented multimodal AI workflows supporting text, image, and voice-based symptom analysis with AI-driven recommendation systems, reducing manual preliminary health analysis effort through centralized digital healthcare workflows.
 - Developed real-time monitoring pipelines and predictive healthcare analytics using WebSockets, NLP workflows, and intelligent processing systems for continuous patient activity tracking and healthcare insights.
- Technologies:** React.js, Flask, MongoDB, TensorFlow, Tailwind CSS, WebSockets, NLP, Ollama

Automated Individual Daily Work Reporting System

 GitHub | Live

2026

- Developed an automated employee activity tracking platform integrating GitHub Webhooks, Google Sheets, PostgreSQL, and WhatsApp automation workflows.
- Built centralized automation pipelines for real-time activity monitoring and scheduled reporting, reducing manual reporting effort by 3+ hours weekly.

Technologies: React.js, Node.js, Express.js, PostgreSQL, GitHub Webhooks, Google Apps Script, WhatsApp Web.js

Text-to-Design AI Platform

 GitHub

2025

- Developed an AI-powered platform that converts natural language prompts into responsive UI layouts and reusable frontend components using Generative AI workflows.
- Integrated intelligent prompt-processing and dynamic rendering pipelines, reducing prompt-to-prototype UI generation time by approximately 60% for rapid frontend development workflows.

Technologies: React.js, Tailwind CSS, Node.js, Express.js, Gemini API, Generative AI

AI Job Finder — Automated Job Aggregation & Alert System

 GitHub

2026

- Built an automated job-aggregation platform that scrapes AI/ML and Software Engineering roles across Wellfound, Greenhouse, and Lever, filtering results by role, location, and experience level.
- Engineered a persistent deduplication system to track previously seen postings and deliver only new matches, eliminating redundant alerts across daily runs.
- Automated end-to-end scheduling and delivery using GitHub Actions and Gmail SMTP, sending formatted HTML digest emails on a daily cycle with zero manual intervention.

Technologies: TypeScript, Python, GitHub Actions, DuckDuckGo Search API, Gmail SMTP, HTML Email Templating

Achievements

- Solved 200+ problems across LeetCode and competitive coding platforms covering Data Structures, Algorithms, and problem-solving concepts
- Built and maintained 60+ public GitHub repositories focused on AI systems, automation workflows, full-stack platforms, and developer productivity tools.
- Maintained 300+ day consistency streaks across coding, learning, and professional development platforms
- Achieved 5-Star in Python on HackerRank
- Secured 2nd Place in LeetCode Boot Camp — SNS College of Engineering (2025)
- Selected for 2nd Round of Smart India Hackathon (2024)

Certifications

- Microsoft Certified: Azure AI Apps and Agents Developer Associate
- Microsoft Azure AI Fundamentals
- Google Cloud Skill Badge — Prompt Design in Vertex AI
- Databricks Accredited Generative AI Fundamentals
- AWS Foundations of Prompt Engineering
- LangChain — Introduction to LangSmith

Education

- **B.E. Computer Science and Technology**2022 – 2026
SNS College of Engineering, CoimbatoreCGPA: 8.17
- **Higher Secondary Education (HSC)**2021 – 2022
Annai Violet Matric Higher Secondary School
- **Secondary School Education (SSLC)**2019 – 2020
Brilliant Matric Higher Secondary School
